CROSSFIELD

Monthly Meeting Municipal District of Rosebud

The regular monthly meeting of the council was held in Crossfield on the 24th inst. All members being present.

Correspondence regarding hospital cases, relief, and old age pensions were discussed and dealt with and several accounts were passed.

The weed inspector was present and reported on conditions in the district.

Threshing Record

The Everett Bills - Ed. Meyers combination, threshed 3100 bushels of wheat on Tuesday and 3160 bushels on Wednesday on the farm of O. E. Coffin. This looks like a record with a 32 inch separator.

Good Yields

Threshing is now general throughout the entire district. The heavy rain on Friday held-up operations for two or three days, but with ideal weather this week, every rig was running on Wednesday, while some machines east of town got started on Tuesday.

Excellent yields are reported and 30 to 45 bushels to the acre is common. O. E. Coffin threshed 135 acres of wheat that averaged 45 bushels to the acre. Wm McCaskill had a field of 45 acres that went 50 bushels to the acre and is a beautiful sample of Garnet wheat. Everett Bills got 9300 bushels of wheat off 200 acres of summer fallow and spring plowing.

G. G. Huser has 2000 acres in wheat and from present indications will average 30 bushels to the acre or better.

Herb Stewart has 1700 acres in wheat and although it is too soon to predict an average, a heavy yield is looked for.

The bulk of the wheat marketed so far is grading well. Most of the Garnet is grading No 2, with some three and four.

No Lights Cause Accident

An accident occurred on the road near the Fleming farm early Monday night, when J. Massie driving into town, collided with a horse and buggy driven by Mrs. E. J. Bartholomew. The car side-swiped the buggy and turned it over into the ditch. Mrs. Bartholomew was badly bruised and shaken up. There was no damage done to the car, whilst the buggy was slightly damaged.

The lights on Mr. Massie's car had burned out and he was driving along slowly or the accident might have been serious.

Tea and Sale of Home Cooking

The Ladies Aid of the Crossfield United Church will hold a tea and sale of home cooking in Halliday's Store on Saturday afternoon, Oct. 1st.

To Be Married on Sunday

The marriage of Miss Frances McFadyen and Mr. A. J. Hunter will take place at the Anglican church on Sunday afternoon at 2.30. The Rev. W. Attwood of Calgary will officiate.

POST OFFICE CHANGES

On and after Sept. 25.

Northbound
523, daily except Sunday 9.40 a.m.
525, daily 6.16 p.m.

Southbound
524, daily except Sunday 1.24 p.m.
526, daily 7.32 p.m.

Mail leaves for Madden and Dog Pound on Tuesday and Friday.

The rural route leaves on Wednesday and Saturday.

WHEAT

Crossfield, Thursday, Sept. 29
No. 1 Northern 30 1-20

Gordon Young left on Sunday for Three Hills, where he has accepted a position as assistant in the Midland-Pacific elevator.

Austin Whillans left on Tuesday for Calgary, where he will attend Mount Royal College.

Annual Banquet and Social Evening, Monday, October 10

The Catholic Women's League are holding their annual banquet and social evening in the U. F. A. Hall on Monday, October 10th.

The committees in charge are working to make this the best they have ever held. Following the banquet, which will start at 6.30, will be a musical entertainment. On the programme are several artists from Calgary and other well-known entertainers.

A good orchestra has also been engaged. Young and old are assured of a real good time.

We will print the banquet menu in next week's paper, and we can tell you right now that it will make a lot of good banquets look like a hand-out.

Remember the date — Monday, October 10.

World's Series Baseball

New York Yankees took the first game of the world series from the Chicago Cubs on Wednesday, by a score of 12-6. New York also won the second game played today, by a score of 5-2.

There will be no game on Friday as the teams move to Chicago.

Showers for Bride-elect

On Saturday evening, Mrs. F. Mossop and Mrs. A. McFadyen were joint hostesses at a shower at the home of Mrs. Mossop for Miss Frances McFadyen, who is to be married on Sunday. Little Elsie Mossop and Vida McMillan, dressed as bridesmaids, received the guests.

Miss McFadyen received many charming gifts and the best wishes of her friends for her future happiness.

A very dainty lunch was served by the hostesses. Some twenty-four guests were present.

Mrs. A. High and Mrs. E. Devine were joint hostesses at a bridge and shower at the home of the former on Friday evening in honor of Miss Frances McFadyen. Many useful and beautiful gifts were received by the bride-to-be.

Married Fifty Years

Mr. and Mrs. J. H. Oneil celebrated their golden wedding anniversary on Sept. 18, when members of their family gathered at their home, to congratulate them on the fiftieth anniversary of their wedding.

Mr. and Mrs. Oneil were married at Harrietsville, Ont., coming west to the Oneil district in 1904, where they have made their home since.

Armistice Dance Nov. 11th.

The Canadian Legion are holding their annual Armistice Dance in the U. F. A. Hall on Nov. 11th.

Tickets are now for sale by members of the Legion.

Remember the boys and be ready to buy your ticket when they call. Dance tickets are 50 cents. A ten dollar bill will be given to the holder of the lucky ticket.

Track Meet, Wed. October 5

Local student are training hard for the Inter School Track Meet to be held at Carstairs on Wednesday of next week.

Crossfield won the cup last year by winning the greatest number of points, and are working hard to retain it this year.

With the Wednesday half-holiday it is to be expected that a large number of supporters will accompany the athletes to Carstairs.

Hughie Picks New York

We have received a letter from Hughie McIntyre and he passes along a tip on the world series. His advice is to bet plenty on Ruth and Gehrig as they are a cinch to win.

We regret that Hughie's tip arrived too late or we might have give Archie and Happy plenty of odds and then cleaned them.

Notice

Owing to the continued depression
we will allow

60c per bushel for

Success Crowns Efforts Made To Save Antelope Herds In Their Native Habitat

Canada's success in bringing back the buffalo has been acclaimed by wild life conservationists in many parts of the world, but little has been said of her successful efforts in saving the prong-horned antelope in its native habitat in Western Canada. The march of settlement in the West made disastrous inroads on the numbers of these timid animals and when their condition was brought to the attention of the Dominion Government immediate action was taken through the Department of the Interior to establish reserves for their protection and propagation. In 1914 the first sanctuary to be established was that to be later known as Wawaseky Park, an area of 64 square miles in southern Alberta about 75 miles east of Lethbridge. Early in 1918, an area, later to be known as Nemiskam National Park, about 20 miles north of Medicine Hat, Alberta, was set aside for the protection of antelope in that district and since then the success of the Department's efforts has been most remarkable.

The main work in the conservation of the antelope is taking place at Nemiskam Park since the area of eight and a half square miles comprising the sanctuary is fenced and a definite record of the progress of the work can be kept. The herd of approximately 425 antelope in this park represents the results of an interesting experiment. Previous to 1915 efforts at raising antelope in captivity had been unsuccessful owing to the effects of the shock of capture. Consequently officers of the Medicine Hat Branch of the Department of the Interior, in charge of the work, hit upon the scheme of corralling a herd of antelope on a suitable grazing area. A herd of forty-two animals were observed feeding north of Medicine Hat, and the work of fencing the animals in without disturbing them was successfully carried out. Since then they have thriven evidently unconscious of their captivity and these graceful native animals are rapidly being restored in numbers.

At Wawaseky National Park, as far as observations of those in charge of the park show, the antelope which frequent this unfenced reserve are increasing. Concentrations of these animals are noticeably greater throughout the area than previous to the establishment of the park and their future in this part of the province appears assured.

Higher Wheat Price Needed

Would Do More Than Anything Else To Bring West Back

However, taking Western Canada as a whole this will not be a debt-paying year. Most farmers will be able to meet their current bills and their taxes and to provide for seed and feed. The more fortunate ones will also have enough to pay the current mortgage interest.

The crop is big enough to make every few cents advance in price important. Westerners are not looking for higher prices, they are praying for them nevertheless. No single factor could do more to bring back the West than a rise in the price of wheat. Nothing else can do the job alone.—Financial Post.

Money In Pie Business

The pie business has been good in Chicago to George Kanopara, 72. He was peddling individual pies when Policeman John Frye asked him about his license. "I can't afford to waste money on licenses," he said. So the policeman searched him to see just how poor he was. In a pocket of his trousers there was \$7.516.

Miss Margaret Jones, aged 85, has just resigned as bellringer at the Llandow-Abertawe, Wales, church.

"You only married me for my money."
"Just the opposite, dear. Because I had none."—Wahne Jakob, Berlin.

W. N. J. 1931

Wealth From the Land

Increase in Revenue From Alberta's Farm Products Is Expected

Several million dollars' increase in revenue from Alberta farm products is expected in 1932, compared with the 1931 figures, according to financial men.

The 1932 revenue is expected to exceed \$152,000,000 compared with \$147,000,000 in 1931.

Alberta's farm animal production for 1932 will total \$16,000,000 it is estimated. The dairy industry is estimated to realize \$12,000,000, while poultry and poultry products may reach \$8,000,000. Miscellaneous commodities, it is believed, will return \$300,000.

These figures, added to \$116,000,000 set as the value of this year's field crops, result in the estimated \$152,000,000 total.

This does not allow for probable increases in market prices. If any improvement in prices occurs the total will be much larger, it is pointed out.

Reducing Temperature

Offices Cooled As Well As Heated By Steam

A system for cooling business offices by steam has been tried with success in Detroit. Steam under high pressure is passed through a nozzle at high velocity where it acts as a pump to remove the air and vapor from a tank of water. This produces a vacuum, cools the water rapidly, and the water is then pumped through cooling coils to reduce the temperature in the rooms. Modern science has thus destroyed another illusion, that janitors only work in the winter months.

(By Ruth Rogers)

SMART AND LOVELY FOR FALL SCHOOL TERM IS THIS WINE-RED TWEED

What about a new woolen frock for early fall school wear? There's loads of style and chic about today's pattern. And it's so simple to make.

Lots of woolen materials will be lovely for it from the woolen fancies to the lightweight tweeds.

You could also make it of rayon, novelties and wool crepe.

Quite a smart dainty effect is obtained by the pleated ruffling trim.

Style No. 682 is designed for sizes 8, 10, 12 and 14 years. Size 10 requires 2 1/2 yards of 39-inch material with 2 yards of plating.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

ASSISTANT (to Beach Inspector): "What are we to do about that one down there, sir? She's wearing a bit of costume and then wait a bit before the next bit."—London Opinion, England.

Mild Winter Predicted

Cree Indians Say There Will Be Lots Of Snow

Western Canada can prepare for a mild winter with plenty of snow. A late fall and an early spring will cut down the winter far below its usual length. That's the decision of the official weather men of the Cree Indians at The Pas, Man.

Year after year the Indians have been calling the turn on the weather and always correctly. The uncanny skill of the aborigines in forecasting the weather for the coming season is highly respected in the north country. To gain their information they closely observe the actions of muskrats and other animals at this time of the year.

Paris Fighting Aids

Paris is fighting its third invasion of pests. First a swarm of mosquitoes visited the French capital. Then followed a plague of blue flies. This time it is ants. The health department has marshalled all its forces, armed with sprays, disinfectants and other paraphernalia, and is directing an onslaught on the invaders. A number of bakeries near the bureau and other buildings in other parts of the city have been overrun by the busy insects.

About nine per cent. of the forest fires are due to railroads, it is said.

China has decided to participate in the Chicago exposition next year.

Churchill Could Have Handled More Wheat

Shipping Agent Disappointed In Amount Of Tonnage Offered

With the successful clearing from Churchill of all boats in that vicinity, some 2,000,000 bushels of grain will have been exported in the first commercial season of the Hudson Bay route, Thomas Harling, shipping agent, said at Montreal. Eight steamers were chartered this year to carry grain overseas from the northern port.

"It would have been possible to handle a much greater quantity," Mr. Harling said, "and I am a little disappointed that more tonnage did not come out." The area about Prince Albert and Saskatchewan can provide approximately 45,000,000 bushels for shipment through Churchill annually, he said.

Free storage in the elevator at Churchill and elimination of transfer charges had been of assistance in promoting use of the new route, but Mr. Harling expressed the belief that establishment of ordinary rates, such as prevail in Montreal and other ports would have little effect on the volume of shipments next year.

The question of rates at the Hudson Bay port would probably be dealt with in the report of the transportation commission, Mr. Harling said.

Neptune's satellite is supposed to be about as large as our moon and it moves around the planet in a little less than six days.

Exports Of Home Grown Wool Have Developed Rapidly During The Past Few Years

Plymouth Rocks Sent To Arctic Outpost

Aklavik Residents Look Forward To Having Fresh Eggs

No longer will residents at Aklavik, one of the last outposts in the western Arctic, sigh for nice fresh eggs. Aklavik, which is more than 1,500 miles north of Edmonton and up in the Arctic circle, has had its population increased by thirteen pullets and two roosters, and the residents will have fresh eggs—that is if the hens continue to lay.

G. M. Cormie, provincial poultry commissioner, shipped the feathered flock to P. Stromberg, described as a "poultry fancier of Aklavik." Aklavik has no chickens at the present time, it is stated.

The chickens travelled by train to McMurray and then by boat to Aklavik. They are pure-bred-to-day-bred Plymouth Rocks and are five-and-a-half-months' old pullets.

The hens are in good condition to face the long winter darkness of the north. On the trip north they were fed a special laying mash and whole grain to keep them laying until they arrived.

In announcing the trip by the chickens, the poultry branch remarks that civilization is going north. In this connection it might be recalled that a team of horses went as far north as Arctic Red River by boat last year to do various pieces of work around different posts. At Arctic Red River children who had never seen horses gaped open-mouthed at them and called them "big dogs."

Imagine The Rest

The somewhat shortsighted golfer had reached a stage of the game when desperate measures were necessary. Taking a tall tee he smote savagely, and instantly searched the heavens for the ball. "Where did that one go to, caddy?" he asked in accents of great hope. "A couple of feet behind yer, sir," answered the boy gloomily.

Irish Parent—"Didn't I see you kiss my daughter, sir?"

Nervy Youth—"How should I know? Do you think I'd be gawking around when I was doing a thing like that?"

HUNTING IN CANADA

WIDE VARIETY OF BIG AND SMALL GAME HUNTING GROUNDS EASILY REACHED

SEASONS OF GENEROUS LENGTH

Hunting Grounds Easy Of Access
Accessibility is an outstanding feature of much of Canada's hunting territory. The country is well served by roads, railways and steamboat lines, over which the sportsman may travel in comfort, to the "going in" point. Areas previously inaccessible may also now be reached by a plane in a few hours' flight. Detraining or "going in" points are numerous throughout game areas and at these will be found reliable outfitters and qualified guides, who are prepared to look after the sportsman's every need and guidance while in the hunting territories. In several of the provinces it is compulsory for the hunter to be accompanied by a guide, but, even in those provinces where it is not compulsory, it is often advisable to engage guides. These men, being familiar with the territory in which they operate, are able to add greatly to the enjoyment and success of the trip.

Conservation Of Game
In Canada a practical form of conservation is found in the setting aside of tracts of public lands, as game reserves, and in the rigid protection of game in its extensive national and provincial parks. In these areas the game multiplies rapidly, under protection, and spreads over into the surrounding country. This favourable condition, coupled with sound protective legislation regulating the open seasons, bag limits, issuing of licenses, etc., assures continuance of a supply of game animals and birds in the future. The hunter exceptional opportunities for sport in season.

Hunting With Camera
To the camera-hunter and the student of wild life, the Canadian Provinces offer unusual opportunities for interesting experiences and records. There is no closed season on game to the camera-hunter, and throughout the year, he will find favourable conditions to study the habits of game animals and birds and to photograph them in their natural surroundings.

Game Laws Of The Provinces
The game laws of the different provinces are drafted by the provincial governments with a view to maintaining the game supply. Consequently there is no uniform game law for the Dominion as a whole. As these game laws are subject to revision from year to year, persons contemplating a hunting trip are advised to obtain copies of the current game laws and regulations of the province in which they intend to hunt.

The National Development Bureau of the Department of the Interior at Ottawa will gladly supply information on hunting in Canada or either comply with requests, or referring same to other sources from which the particulars desired may be obtained.

Canadian exports of home-grown wool have developed rapidly since the war. They now amount to a yearly average of 7,000,000 lbs.—about 40 per cent. of the whole Canadian production—as compared with only a million pounds per annum in pre-war days.

Prior to 1931, the bulk was taken by the United States, but last year the United Kingdom took the major part of Canadian wool exports.

These facts are revealed in a new report on the production of, and trade in, wool issued by the Empire Marketing Board: "Wool Survey: A Summary of Production and Trade in the Empire and Foreign Countries."

Nearly one-half of the world's raw wool, and over two-thirds of the wool entering trade is produced within the British Empire. The world's sheep population is estimated at nearly 800 million head, of which about one-third are in the Empire. They produce between 3,500 and 4,000 million lbs. of wool per annum, and of this amount about 1,500 million lbs., including much of the best wool in the world comes from the British dominions of Australia, the Union of South Africa and New Zealand.

Among the other important producing areas, consisting of South America, the United States of America, and Russia, only South America has a surplus for export. The United States of America is largely self-sufficing as regards merino and cross-bred wools, but imports carpet wools. Russia produces almost entirely carpet wools, and imports both the finer wools and wools of the carpet type. Neither of these countries seems likely to assume any importance in the near future as an exporter of raw wool.

After reviewing the development of the sheep population, the wool production and the wool trade of each of the principal countries concerned, together with the course of raw wool prices over the past 40 years, the survey reaches the following conclusions:

There has been no exceptional increase in the sheep population or the wool production of the world in recent years; indeed, between 1925 and 1930 there appears to have been a small decrease in wool production, and although in the year 1931, according to the partial estimates at present available, probably witnessed an increase in production over 1930, it is not anticipated that the record level of 1925 will be appreciably exceeded. British Empire countries have maintained their share of the world's sheep population at about one-third, and their share of the world's production of raw wool at about one-half.

In the export trade, in which the share of Empire countries is over two-thirds of the world's total, there has been, on the whole, little variation since 1926 in the consignments of raw wool from producing to manufacturing countries, and there would appear to be no abnormally large accumulation of stocks of new wool in the principal exporting countries. At the end of the 1930-31 season, when stocks in certain of the principal producing areas were higher than usual, they still formed only a very small part of the aggregate annual production. No large stocks have been allowed to accumulate through efforts to maintain prices, and proposals to restrict the sales or stabilize the prices of raw wool have been vigorously opposed.

Are Safely Kept
Units of weight and measure are kept buried in England and are dug up every tenth year. The standard yard measure, made in bronze, and the standard pound and kilogram weights, of platinum, are kept in the vault of the masonry of the House of Parliament.

The Bulgarian language is spoken by approximately 5,600,000 people.

"Where does this path go to?"
"It doesn't go anywhere. Can't you see how still it is?"—Gutterres, Madrid.

Try Lydia E. Pinkham's Vegetable Compound

Too "Worn-Out" to go

Another day broken... Couldn't stay on her feet a minute longer! Lydia E. Pinkham's Vegetable Compound always relieves cramps. Try it next month.

WORLD HAPPENINGS BRIEFLY TOLD

Sir Ronald Ross, noted authority on tropical diseases, is dead, aged 75. The adventurous whaling industry may be revived to prosperity on the British Columbia coast as a result of a rise in oil prices of 30 per cent.

Rolling an automobile tire before him, Emory Cross took off from Wexford, Ont., on a seven-year jaunt around the world.

The city of Tarsus, home of Saint Paul, was swept by fire. The flames destroyed 144 houses with the loss of \$100,000.

The admiralty ordered the keel to be laid on October 1 for Germany's third "pocket battleship," to be known for the present as "armored ship C."

For lack of funds Berlin streets have for years been so badly neglected that a number of important thoroughfares have now been closed for heavy trucks.

Mrs. W. Thrift, of Sidcup, England, whose husband was reported missing during the World War, has just been notified that he was killed near Cambrai.

A number of Alberta areas face a potato shortage because of two months of hot weather without rain this summer, according to Calgary merchants.

Sweden is motorized. Of every 100 vehicles one meets on its roads, only 11 are horse-drawn, the annual Swedish Road Congress at Gothenburg, Sweden, was told.

Sir Henry Simson, the physician who was in attendance at the birth of Princess Elizabeth and Princess Margaret Rose, children of the Duke of York, died suddenly of a heart attack. He was 69 years old.

Big Fur Shipment

Furs To Value Of Half A Million Arrive From H.B. Region

A ton and a half of fur from the northern barren lands, principally from along the west coast of Hudson Bay, passed through The Pas, Man., recently, on the way to the markets of the world. The shipment is valued at roughly half a million dollars.

The fur-fox, mink, marten—was taught during the past year by Eskimo, Indians, and white trappers in the sub-Arctic wastes. Only the richest and most choice fur was brought down.

From Chesterfield Inlet and other points it was flown to Churchill by the three Junkers "planes of the Canadian Airways," and then loaded on to the famous musk train that plies between the northern port and The Pas, Manitoba.

The fur will go by Canadian National Railways to the Revillon Freres Company in Canada and the Hudson Bay Company in London, England.

Epitaph Was Fitting

Tombstone Dealer (after several futile suggestions): "How would just a simple 'Gone Home' do for an inscription?"

The Widow: "I guess that will be all right. It was always the last place he ever thought of going."

A: "Do you know your wife is telling everyone you can't keep her in clothes?"

B: "That's nothing. I bought her a home and I can't keep her in that either."

It is so much easier to succeed after the others have quit.

"If that is art, I am a fool."
"Yes, it is art and of the best kind."
—Buen Humor, Madrid.

W. N. U. 1931

Gift For Schenectady Historical Society

Office Chair Was Once Owned By Thomas Edison

A large old-fashioned chair owned by Thomas A. Edison, in the early days of the Edison General Electric Company, has been presented to the County Historical Society by the General Electric Company. It has witnessed in a sense the whole growth of the electrical industry in Schenectady. Amos Underwood, production manager of the turbine department at the Schenectady works, fell heir to it on the retirement of Langdon Gibson, former production manager of the Schenectady works. Gibson obtained the chair early in his career with the company and carried it with him from office to office.

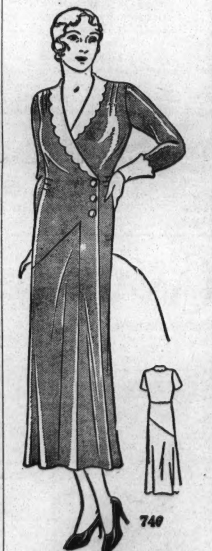

Believe It Or Not

Earthworms In Australia Attain Length Of Ten Feet

An earthworm, native to southeastern Australia, attains enormous lengths of ten or twelve feet and diameters of three-fourths of an inch, although the average specimen is only three or four feet long. It belongs to the same species as our common earthworms. The progress of these gigantic worms through the soil is attended by gurgling and sucking sounds clearly audible to persons walking on the surface. Their eggs resemble large olives. Related species which attain a length of several feet are found in parts of South America, Java and other sections of the world.

(By Ruth Rogers)

A WRAP-AROUND MODEL FOR YOU IF YOU'RE A WEE BIT HEAVY

Still another smart and flattering style for matrons. And it's cut on the wrap-over lines so becoming and liked. There's a slenderizing bias line at the front and at the back that reduces the hip bulk. The shawl collar is very becoming. And don't you like the shaped sleeve cuff?

So many charming materials can be used for this slim-line model. The original was rhum-brown wool crepe with white pique trim.

It's perfectly stunning in black crepe satin with a cotton-faille back. Use the dull back surface for the collar and cuffs.

Style No. 746 is designed in sizes 36, 38, 40, 42, 44, 46 and 48 inches bust. Size 36 requires 3 1/2 yards of 36-inch material with 1/2 yard of 30-inch contrasting. Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

CANADIAN DELEGATES GO TO GENEVA

Hon. C. H. Cahan, Secretary of State for Canada (right) has sailed for Geneva to head the Canadian delegation to the meetings of the assembly of the League of Nations convening on September 26. He is accompanied by Madama Charles Fremont (left), who is one of the three delegates representing this Dominion.

A Mark Of Distinction

Ability To Keep Ears Open and Mouth Shut

A man seeking a job advertises in this way in a New York newspaper: "I have just my ears open and my mouth shut, my ears open and my mouth shut, my ears open and my mouth shut. Do you need a front for your business?"

We suspect the gentleman is not being quite frank with his public. Probably he is a very shrewd, capable person who thinks an air of humility, of self-deprecation, an original line of approach, may achieve the results likely to be denied a more orthodox recital of his good qualities.

The fact is, of course, that ability to keep the mouth shut and the ears open is a mark of considerable distinction and a virtue commonly denied to a great many persons. The "front" of "good executive appearance" and "nothing to back it up" is much more apt to keep his mouth open and his ears shut. If he knows enough to reverse the process he is more than just a front—Ottawa Journal.

Treasures Of Harewood House

Henry Lascelles, Original Owner, Was West Indian Millionaire

Harewood House, near Leeds, England, where the King and Queen spent a week-end in August, with the Princess Royal and Lord Harewood, was built about 150 years ago at a cost of £120,000. It took 12 years to erect. The State apartments command a magnificent view of beautiful Wharfedale, and contain some wonderful ceilings, plaques and paintings, as well as some of the finest specimens of Chippendale furniture in the world. Henry Lascelles, the son of the Harewood family, was a West Indian millionaire, and in Harewood House there are nearly 60 massive mahogany doors made from wood grown on the West Indian estates.

Recipes For This Week

(By Betty Barclay)

ORANGE AMBROSIA DESSERT

(Serves 4-6)

This is a modern version, adapted to salad serving, of the ambrosia, which was Grandmother's favorite company dessert. Ambrosia, by the way, was the food served the Greek gods in their feasts on Mount Olympus. While this ambrosia and delectable combination of orange coconut will not confer the immortality given by the ambrosias of the gods, it is a dessert par excellence for better health.

6 oranges.

1/2 cup strained honey.

1 can coconut.

Peel oranges, removing skin down to juicy pulp. Cut in slices and cut slices in half. Dip each piece of orange in honey which is placed in a shallow dish, then in coconut. Arrange on crisp lettuce leaves. Serve with whipped cream to which a little mayonnaise has been added.

1/2 cup evaporated milk.

1/2 cup water.

1 teaspoon dry mustard.

1 teaspoon salt.

1 tablespoon granulated sugar.

2 tablespoons flour.

Dash of cayenne.

2 egg yolks.

2 tablespoons butter.

1/2 cup vinegar.

Blend evaporated milk with water and bring to scalding point in a double boiler. Thoroughly mix dry ingredients. Add slightly beaten egg yolks gradually and blend carefully. Pour hot milk slowly over egg mixture, stirring constantly. Return to double boiler. Add butter and cook until mixture thickens, stirring constantly. Heat vinegar, and add slowly. Blend thoroughly. Strain and cool. Makes 1 1/2 cups.

COOKED SALAD DRESSING

1/2 cup evaporated milk.

1/2 cup water.

1 teaspoon dry mustard.

1 teaspoon salt.

1 tablespoon granulated sugar.

2 tablespoons flour.

Dash of cayenne.

2 egg yolks.

2 tablespoons butter.

1/2 cup vinegar.

Blend evaporated milk with water and bring to scalding point in a double boiler. Thoroughly mix dry ingredients. Add slightly beaten egg yolks gradually and blend carefully. Pour hot milk slowly over egg mixture, stirring constantly. Return to double boiler. Add butter and cook until mixture thickens, stirring constantly. Heat vinegar, and add slowly. Blend thoroughly. Strain and cool. Makes 1 1/2 cups.

Blend evaporated milk with water and bring to scalding point in a double boiler. Thoroughly mix dry ingredients. Add slightly beaten egg yolks gradually and blend carefully. Pour hot milk slowly over egg mixture, stirring constantly. Return to double boiler. Add butter and cook until mixture thickens, stirring constantly. Heat vinegar, and add slowly. Blend thoroughly. Strain and cool. Makes 1 1/2 cups.

SUNDAY SCHOOL LESSON

OCTOBER 2

CHRISTIAN STANDARDS OF LIFE

—THE CHRISTIAN'S DEVOTIONAL LIFE

Golden Text: "Grow in the grace and knowledge of our Lord and Saviour Jesus Christ."—2 Peter 3:18.

Lesson: Psalms 1:1-6; 119:10-16; Daniel 8:10; Matthew 6:15-16; Timothy 3:14-17.

Devotional Reading: Psalm 122.

Explanations and Comments

Prayer in the Christian's Devotional Life, Matthew 6:15-16.—It was the appearance of righteousness that the hypocrites coveted, not the righteousness itself, and Jesus bade His disciples not to pray as they do—standing in conspicuous places to be seen of men. They have received their reward, said Jesus; they have been seen of men and this was what they desired; they have no claim whatsoever for any further reward.

"After this manner therefore pray ye": thus the Lord's Prayer is prefigured in Matthew's Gospel. It is indeed more than the prayer which follows is the only one to be offered. Rather does it counsel us to let our prayers be constituted like this Model Prayer, to let them deal with divine and human interests, with spiritual and physical wants; it reminds us of many things which we are prone to forget when we commune with God. Too many things of prayer as petition for personal needs or desires, whereas this prayer is for God for self and is concerned chiefly with God's interests and our spiritual needs.

The prayer naturally divides into two parts: first, the things of God, second, the things of man. "Our Father," is the address with which the prayer begins. God is powerful—Pater begins. God is never so addressed in the Old Testament, but Jesus Himself always addressed Him as Father.

"Prayer is communion with God, not as the Supreme Governor who controls the universe, but as the Father who advises, strengthens, and forgives His children in answer to their cry of need."—Kierkegaard.

"Our Father, who art in heaven. This is more, shall I say, than God's personal address. Our Father is the place of supreme dominion, love rules the universe."—J. D. Jones.

"Hallowed be Thy name. The name of God stands for God Himself, His revealed nature. Hallowed means revered, honored, revered, worshipped. In this petition we pray that we may honor the Father in thought and life."

There are many ways in which we may fail to hallow God's name. Swearing is profaning God. Irreverent speech is profaning Him. Irreverent worship is profaning Him. Irreverent ideas of His Nature, thinking Him cruel, unkind, is profaning Him. Deeds profane the name of God more than words can.

"Thy Kingdom come. Let Thy sovereignty be realized, and it will be when the words of the next petition become true: when every one's will is in as perfect accord with God's will as was the will of Jesus."

Veteran Doctor Honored

Kansas People Pay Tribute To Traditions He Represented

When nearly one thousand persons assembled at Mulvane, Kansas, recently to honor the veteran physician who had labored there into the world, they paid tribute not only to an individual but also to the traditions he represented.

The old-fashioned country physician was one of the heroes of his profession. Scientific names now signify the shrewd psychology he administered along with his pills and powders. Under conditions that would be considered impossible today, he performed many feats of surgery. No mud was too deep and no blood was too thick to keep him from answering a call to duty. The midnight beat of hoofs along the pike usually meant that he had sacrificed another night's rest in order to relieve some one's suffering.

The old-time country doctor is passing. As with the circuit rider and the colporteur, his type will eventually become extinct. But the recent assemblage in Kansas shows that modern medicine can well afford to honor the traditions of courage and duty that thousands of country doctors left behind them.—New York Evening Post.

Education Investment

Money Spent In This Way Is Never Wasted

The nation should spend not less money, but more, on education. An elementary school child costs the public \$65 a year, a secondary school about \$100. Who so foolish as to regard these moderate sums as excessive, or too burdensome for the nation to carry? Every penny spent on education is an investment which brings a hundredfold return. There is no asset comparable to a generation sound in mind, healthy in body, and adequately equipped to fight the battles of life.—London Daily Herald.

A dromedary bears the same relation to a camel as a race horse does to a draft horse.

DEFINITE HELP FOR DWELLERS IN APARTMENTS

Orderless way found to cook fish, cauliflower and cabbage

CANAPAR IS A PRODUCT OF HAMILTON FIRM

Lives there a woman, in apartment, duplex or home, who has not at some time or other reluctantly foregone fish, cabbage, and cauliflower because of the odors they give off when being cooked? Or who has not suffered from other people close by who cooked these foods regardless?

Canapar entirely does away with this annoyance. More than that, it actually improves flavor and food value. Cooking in Canapar parallels the famous French method of simmering and confining food and its flavors to the closed casserole.

Canapar comes in large sheets, in a handy-size package. When boiling vegetables you simply wrap them in Canapar and make a bag similar to a pudding bag. If you are steaming them you line your steamer with Canapar, arrange food and seasoning, and fold back corners of the Canapar to prevent steam from dripping back on the food.

Boiled or steamed fish is particularly delicious done this way. No fishy odor in the kitchen, no gummy kettle to clean. When roasting meat, line the pan with Canapar. It prevents the fats and juices from burning, and eliminates scoring of the pan afterwards.

Canapar saves fuel. You can cook three vegetables simultaneously in the same casserole with it, without intermingling odors. And it is very economical. Just rinse the sheet after using it, hang it on the towel rack to dry. Use it over and over.

Lots of women use Canapar for a dish cloth—it is so silky and satisfactory and does not shrink. This is a particularly good use if you happen to pierce the sheet of Canapar while testing the food during the cooking process. It is made by the makers of PAKA-SANI the famous heavy waste paper in the Green box.

Most grocers, druggists and department stores sell Canapar. If you don't, send the coupon direct and we'll give you a new and unique book entitled "Leftovers" containing one hundred recipes as a bonus for your trouble.

MENTIONED FOR PROMINENT POST

EARLY STUDY OF ARMS CUT IS PROMISED

Geneva, Switzerland.—The League of Nations council meeting was confronted with a veritable kaleidoscope of international developments, which were touched off when Russia won her point for speedy consideration of substantial arms reduction plans.

This development came in the conference bureau, a sort of steering committee for the general conference, which is expected to resume soon, Maxim Litvinov, the Russian delegate, proposed the bureau take up the Russian proposal of the United States for a one-third cut.

The two gravest problems before the council are the German demands for equality of armaments on a threat of withdrawal from the disarmament conference, and the filing of the report on the far east prepared by Lord Lytton and his commissioners.

Baron Konstantin von Neurath, the German foreign minister, came to press Germany's demand for equality, and there was evidence league statesmen proposed to concentrate immediately on the German problem.

The Japanese were apparently deeply interested in the two reports widely circulated here: first, that France had changed its attitude towards Japan and now will be found much less friendly to Tokyo's position, and second, that Eamon de Valera, the Irish Free State president who will preside over the council, will have little sympathy with Japanese views.

Observations Will Be Given Hearing

Ex-Service Men May Submit Memorandum To Committee

Ottawa, Ont.—Opportunity to organizations of ex-service men who desire to offer any observations relating to the administration of the pension act will be given by the Rinfret committee, it was decided when that body sat "in camera."

The statement adds: "It is requested that such observations should take the form of a memorandum in writing which will be placed before the committee for its consideration, if received by the secretary, Daily Building, Ottawa, before the end of September."

Manitoba Marketing Bonds

Syndicate In Handling The Four Million Dollar Issue

Winnipeg, Man.—Manitoba's new \$4,000,000 bond issue will be placed on the market at \$96.75 and will yield a little better than 5.95 per cent. interest, Hon. E. A. McPherson, provincial treasurer, announced today a syndicate of eight banking and investment houses is handling the issue.

All arrangements have been completed for offering the bonds to the public, Mr. McPherson said. They will bear interest at the rate of five and one-half per cent. on their face value, and will mature in 23 years. Principal and interest are payable in Canadian funds.

Chinese Won Case

Logic Of Orient Was Convincing For Toronto Magistrate

Toronto, Ont.—Unanswerable logic of the Orient won a case for Lee Hui in health court. Lee was accused of dumping rubbish over his back fence on to a piece of city property.

Arguing his own case Lee reasoned thus: The grass on the lot was nearly a foot high but where the rubbish lay there was no grass at all. Therefore, it had lain on the ground for a much longer period than two weeks. Lee moved in only two weeks ago.

Magistrate Arthur Tinker, speechless, dismissed the case with a wave of the hand.

No Holiday For Commons

Ottawa, Ont.—The House of Commons will sit on Thanksgiving Day, Monday, October 10. Inquiry made in highly informed official circles elicited the definite information that the Commons would proceed with the debate on the address on that day. Parliament opened the preceding Thursday.

Approve Distress Relief Fund

Stresa, Italy.—The Danubian Conference has approved in principle a draft convention recommending among other steps the creation of a stabilization fund of \$75,000,000 gold francs to relieve distress in central and southeastern Europe.

W. N. U. 1981

Ask Aid For Bay Route

Regina Men Want Traffic Department To Solicit Shipments

Ottawa, Ont.—Establishment of an active traffic department by the government which would solicit shipments for the Hudson Bay Railway and the northern ocean port of Churchill has been urged on Hon. R. J. Manion, Minister of Railways and Canals. This step was advocated by C. B. McKee, past president of the Regina Board of Trade, and George A. Ewart, present commissioner of the board.

"Mr. Manion received us very cordially and courteously," said Mr. McKee. They were assured the matter would be given consideration. Both Regina men advanced the opinion the government, to crown its work in providing an outlet to the sea for the prairie provinces, should have an active traffic department in order that importers may route as large a portion of their goods as possible via the new trade channel.

"Through the Hudson Bay Railway, western Canada is brought 1,000 miles closer to the markets of the United Kingdom," said Mr. McKee. "When the insurance rates come down to a more equitable level, a material saving will be effected in export costs," he added.

Some 2,500,000 bushels of wheat would be exported to Great Britain this season over the northern route, and Mr. McKee stated the first shipment of 250,000 bushels had been carried out at a saving of approximately a cent a bushel.

Indians Encamped On Ancient Reserve

Take Possession Of Land Near Selkirk, Manitoba

Winnipeg, Man.—Led by a militant chief, a band of 35 families of the Saulteaux Indian tribe has defied orders of authorities and encamped on what they claim as their ancient reserve, 12 miles north of Selkirk, Man.

The Indians claim the move marks the climax of a dispute of 25 years standing. In 1907 the band surrendered the reserve at St. Peter's and under the terms of an agreement were to get \$90 per head and a reserve at Fisher River. Chief Grey Eyes, head of the band, claims his people never received \$90 and have been unable to make a living on the Fisher River reserve.

Royal Canadian Mounted Police later removed 35 families from their old stamping grounds. The natives, who had been trespassing on private hay lands since last July, camped along the road allowance.

Britain Faces Milk Strike

Better Prices For Product Is Asked By Farmers

London, England.—Britain, Tuesday night, September 20, faced a country-wide hold-up of milk supplies as result of farmers' decision to inaugurate a "milk strike" October 1, following breakdown of negotiations between their representatives and representatives of the milk-distributing combines over contract for the forthcoming year.

A statement issued by the National Farmers' Union says the decision of the milk distributors to refuse farmers better prices for their product during the coming year renders inevitable a hold-up in the supply. Unless a last-minute step is taken, the "strike" will go into effect at the end of this month.

All Canada's Gold Comes From Mines

No Swindle Here Such As Reported From Washington

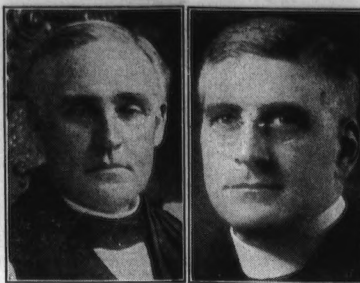

Ottawa, Ont.—Practically all the gold which flows into the mint here comes from the mines, it was stated at the department of finance.

Despatches from Washington state that action has been taken there to keep swindlers from buying gold and jewelry at bargain prices on the pretence that they want the metal for the federal government. Later this gold is melted down and taken to the mint, there to be exchanged for currency.

Apparently no such swindle has gained any headway in Canada.

Judge Of Supreme Court

Ottawa, Ont.—Mr. Justice Oswald S. Crockett, of the King's Bench Division of the Supreme Court of New Brunswick, has been appointed a judge of the Supreme Court of Canada. He fills the vacancy caused by the death late last fall of Mr. Justice E. L. Newcombe, a former member of the Nova Scotia Bar.

Bishop Owen of Niagara and Dean Carlisle of Montreal (left and right respectively), are two of the prominent Church of England dignitaries who are mentioned most frequently for the post of Bishop of Toronto. The election takes place on October 24th when a successor to Archbishop Sweeney will be chosen by synod delegates.

HOME SECRETARY EXPLAINS ACTION ON TRADE PACTS

London, England.—Trade agreements reached at the Ottawa Imperial Economic Conference by the United Kingdom and the Dominions were condemned in a resolution adopted by the executive of the National Liberal Federation.

The resolution urges the government, parliament and all electors to "seriously consider the dangers and vicious principles inserted in the Ottawa agreements and oppose them by every means in their power." However, no call is made on Liberal ministers to resign from the National government.

Sir Herbert informed the meeting Sir Herbert Samuel, Home Secretary, and the Marquis of Lothian, attended the meeting. The Marquis of Lothian said that the Ottawa proposals were discussed by the cabinet on August 28 immediately after the return of the United Kingdom delegates. Two days later he had sent to his Liberal colleagues in the government a memorandum in which "the situation which had arisen was reviewed and a definite course of action suggested."

Plan Trip To Arctic

French Explorers May Undertake Journey Across Canada By Car

Montreal, Que.—French explorers who made expeditions into Africa and into Central Asia by caterpillar automobiles, may soon undertake a journey across Canada into the Arctic circle.

Jean Allouche, Parisian journalist, who described the previous explorations, is in Ottawa to discuss the possibilities with General J. H. McEwen, commissioner of the Royal Canadian Mounted Police, and to map out for himself an advance trip into the north country. The journalist reached here from France by the Canadian "Aurora."

Allouche will proceed to Vancouver and thence to northern parts of the Pacific. He will visit outposts of the Royal Canadian Mounted Police and missions of the Oblate Fathers in the land of Eskimos. From Dawson City, which he knows well and has visited before, he will travel by aeroplane to Aklavik.

CANADIAN BAR OFFICERS AT BANFF

The executives of the Canadian Bar Association and guests on the terrace of the Banff Springs Hotel. The convention visited the famous Rocky Mountain resort as luncheon guests of Rt. Hon. R. B. Bennett, Prime Minister of Canada. Left to right are, (standing): G. H. Barr, K.C., Regina; Louis St. Laurent, K.C., Quebec, past president; E. H. Coleman, K.C., Winnipeg, secretary-treasurer; H. L. Laird, K.C., Winnipeg; E. K. Williams, K.C., Winnipeg; Robert Taschereau, K.C., M.L.A., Quebec, honorary secretary; J. E. A. MacLeod, K.C., Calgary, Alberta; (sitting, left to right): Maurice Olivier Jallo, Paris, official French delegate; Mrs. W. P. MacCracken, Washington, D.C.; Hon. W. W. Rowell, P.C., K.C., Toronto, president of the Association; Madame Jallo, Mrs. A. L. Smith, Calgary; Hon. W. P. MacCracken, Washington, D.C., official American delegate; and A. H. MacNeill, K.C., Vancouver, B.C.—Canadian Pacific Railway Photo.

Court Rules Firm Bankrupt

Investment Firm Of Machray and Sharpe Out Of Business

Winnipeg, Man.—The second firm with which J. A. Machray, former bursar of the University of Manitoba, chancellor of Church of England and prominent Winnipeg lawyer, was associated, has passed out of existence. The investment firm of Machray and Sharpe was declared bankrupt and last Saturday the legal firm of Machray, Sharpe, Parker, Crawley and Eldridge, was dissolved.

Evidence revealed at the hearing of the bankruptcy petition is only a "small part of the tale that yet will have to be told," Mr. Justice Macdonald declared in granting the university's petition.

The hearing, which Mr. Justice Macdonald said had revealed "alarming disclosures," disclosed that books of the company were kept in a "slipshod manner," that all monies handled by the firm were kept in a single bank account, that the company books were audited by an accountant from the Manitoba government comptroller general's office, also engaged by Machray and Sharpe, that the firm had cash assets of only \$600, and that clients were notified periodically that all accounts were in order though some trust accounts had not even been totalled in the last 16 or 17 years.

Lawyer Drowned At Coast

E. C. Saville Lost Life When Boat Was Upset

Salmon Arm, B.C.—Eustace Claude Saville, barrister and solicitor here for more than 20 years, was drowned while fishing off the Adams River, 25 miles from here on Shuswap Lake.

Saville was in a boat with Major H. W. Roberts when it overturned. He was rescued by party sent to his aid, rescuing Major Roberts, but Saville had evidently been drawn under by the strong current.

PREMIER ISSUES SUMMARY OF RAILWAY PROBE

Ottawa, Ont.—Complete revolution in control and regulation of all railways as well as in the control and management of the National system is directly implied by the official abstract of the report of the Duff transportation commission issued by Prime Minister Bennett.

Three recommendations open an unbridgeable chasm between railway administration in the past and railway administration in the future. They are:

1.—Abolition of the present National Railway directorate and the substitution as the supreme body of control of a board of three trustees.

2.—Provision for a joint committee composed of National Railway trustees and Canadian Pacific directors to formulate and put into operation joint economies, to remove duplication, to prevent unnecessary competition.

3.—Creation of a super-control board, called an arbitral board, of three members to decide matters upon which the joint committee cannot agree.

This board, within a defined, but wide, field of jurisdiction, is to have authority over both railways as well as over the board of railway commissioners. From a decision of the arbitral board there is to be, really, no appeal.

These are the major recommendations, but there are others:

1.—There is a thinly-veiled reference to the "inelasticity" of freight rates being one of the important contributing factors in the present problem. This can have reference only to the Crow's Nest Pass rates, enforced on the railways by statute in 1925. The complete report, when issued, seems likely to carry a recommendation that statutory or inelastic control of railways be withdrawn.

2.—There is an intimation that an official plan for the National Railways will be found in the official text of the report, which indicates that the National's capital structure may be up for revision.

In the negative sense, the report is important because it strongly condemns any scheme of railway amalgamation or of the leasing of the National to the Canadian Pacific. Accompanying the abstract of the report is a brief statement from Premier R. B. Bennett, in which he declares that legislation giving effect to the recommendations which the government decides are in the public interest will be introduced shortly after parliament opens in October.

REVIEW SHOWS CANADA IN GOOD EXPORT POSITION

Ottawa, Ont.—The present crop year commenced with Canada occupying a favorable export position—undoubtedly the best position held by the Dominion since 1928. The Canadian position at the present time is largely due to two main factors, namely, lack of foreign competition and price levels on a sound export basis. So says the monthly review of the wheat situation, issued by the Dominion Bureau of Statistics.

In regard to the domestic situation in Canada, it is stated that: "The large wheat crop combined with a good export demand for Canadian wheat is stimulating the movement of grain in every position. During the past seven weeks the movement of wheat inland and externally has shown a decided improvement over the movement of the same weeks last year. Deliveries to country elevators, the movement from country elevators to terminal markets, the movement from terminal markets and finally the export movement, are all above last year."

"Of particular interest is the brisk movement of Canadian wheat into export trade and into export position. For the seven weeks ending September 16, 1932, 38 million bushels of wheat were shipped by water from Port Arthur and Fort William compared with 25 million bushels for the corresponding weeks last year."

Prince Opens British Trade Exhibition

Was Warmly Welcomed On Arrival In Danish Capital

Copenhagen, Denmark.—Eight thousand Danish accorded an enthusiastic reception to the Prince of Wales when he arrived to open the British trade exhibition.

The prince came by aeroplane from England, setting foot on German soil for the first time since the World War during a stopover at Hamburg. He reached Kastrup airport, near here, at 6:25 p.m. A large Danish military and naval aircraft flew over the field.

"It has been 30 years since I visited Denmark," the prince commented. His distant cousin, Crown Prince Frederik, greeted him on his arrival. The Prince of Wales' grandmother was the Danish Princess Alexandra. Other members of the royal family joined in welcoming him.

Further Pay Cut For C.P.R. Officials

President Hopes Reduction Will Not

Montreal, Que.—On October 1 salary reductions will be effected among all the higher officials of the Canadian Pacific Railway. According to an official statement the president, directors and members of the executive committee will accept a cut of 15 per cent. Salaries of general, district, divisional and departmental officials will be lowered 10 per cent.

Hope was expressed by E. W. Beatty, president of the railway, that it will not be necessary to continue the reduced rate for too long a period, and that the former salary schedule will eventually be restored.

Three Firms Are Losers

Thieves Carry Away Safe Containing Two Thousand Dollars

Winnipeg, Man.—Cracksmen broke into the office of the Corona Lumber Company at Starbuck, near here and carried away a safe containing about \$2,000. The cash belonged to the Ogilvie Milling Company, the Manitoba Wheat Pool and Western Canada Elevators, Limited. Books containing the details of the amount belonging to each firm were in the safe. The burglars escaped in a stolen truck.

Crew All Officers

Victoria, B.C.—Playing a full deck complement of certificated officers, the first ship so manned to leave the port of Glasgow, the British steamer "Movera," Capt. J. L. McQueen, of the Donaldson line, is in Victoria after a passage of thirty days from the Clyde.

Claims Record

Kiel, Germany.—Lola Schöter claimed the world's record for a woman's parachute jump, reporting she had dropped 7,300 metres (about 22,000 feet) in 28 minutes.

A Gratifying Comeback

Condition in Saskatchewan Outlined
By Winnipeg Tribune

Saskatchewan has staged a 90 per cent. comeback in one short year and the big crop areas of the province represent substantial buying power this year, says W. L. MacTavish, editor of the Winnipeg Tribune, who has made a survey of conditions.

The Tribune article, from Regina, reads in part:

"Last year the government had to find \$10,000,000 for relief. This year \$1,000,000 will be ample.

"This spring 8,000,000 acres were seeded with wheat supplied by the government. Next spring requirements will not exceed 100,000 bushels.

"Last year 58,000 families required relief. This year there will be 9,000 families.

"Ninety per cent. of the farmers of the province will be able this year to pay current year's taxes, repay the government for seed, binder twine and binder repairs, pay all expenses of the year's work, and have enough money left to live until after harvest and do next spring's seeding without assistance.

"Three-eighths of the province yielded 20 bushels to the acre or over; one-fourth 15 to 19 bushels; one-fourth 10 to 14 bushels; only one-eighth averaged less than 10 bushels.

"Saskatchewan government will balance its budget this year. Rural municipalities will be able to operate in normal fashion. There are no unemployed in Saskatchewan except they are in harvest fields together with many hundreds of transients."

Most Northerly Oil Producer In World

Fort Norman Well Is Supplying Fuel For Beatz

Fort Norman oil well, believed to be the farthest north producer in the world, is turning out 200 gallons daily of excellent quality refined gasoline. It is thereby meeting the needs for gasoline and fuel oil in connection with the operation of boats to Great Bear Lake and the operation of machinery at the mineral field.

Ray McFie, of Edmonton, who went north by the water route to Great Bear Lake, was the first customer at the well.

The oil is being obtained from Imperial Oil Well No. 2, situated about 80 miles downstream from Fort Norman. It was drilled in 1920 and has been practically inactive since, except for a small amount of experimental work. It was drilled for geological information, after Discovery Well No. 1 was drilled 100 feet nearer the river and had been brought in as a producer. No. 1 for years has had a certain amount of overflow, causing an oil slick along the river for many miles downstream.

No. 2 well was reopened on June 30 by R. W. McKinnon of the Imperial Oil, and his assistant, J. Rowan, and since has been a hive of activity.

Questionable Economy

Letting Equipment Run Down Because Finances Are Scarce

Seldom a day passes during which a gruesome tragedy of some description is recorded. Disasters such as a ferry boat explosion, which occurred in New York some weeks ago, causes one to wonder if many of these fatal incidents are not due to the use of old equipment that is not even kept in proper repair. Explosions of all kinds have occurred throughout the continent which indicates that because finances are scarce equipment has been allowed to deteriorate to a dangerous degree. When the cost of making repairs and not infrequently the settling of damage suits is considered it is doubtful if it pays to neglect necessary repairs.

Marble was introduced into Roman building no earlier than the first century B.C. and was then viewed askance as something associated with Greek luxury.

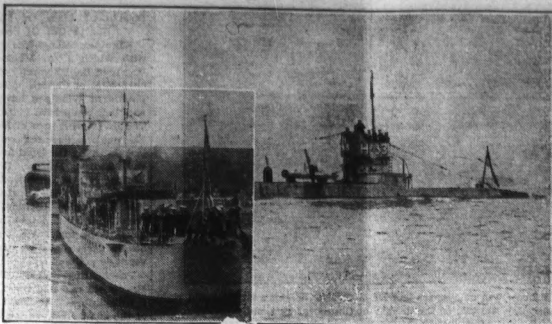

"I hear you are having a new house built."

"Of course. Ever hear of anybody having an old house built?"—Vart Hem, Stockholm.

W. N. U. 1961

MINESWEEPER AND SUBMARINE COLLIDE DURING EXERCISES

British naval exercises near Portland Bill, England, were abruptly terminated when a collision occurred between the mine-sweeper, "Dundalk," and the submarine "H33" in a fog. There were no casualties although the submarine was holed above the water-line. Above is a picture of the submarine, one of the most highly efficient classes in the navy. Although it is one of the smallest type left in the British navy, the "H" submarines are capable of crossing the Atlantic Ocean under their own power. Inset is a picture of the "Dundalk."

Judge Kept His Word

Saluted Mr. Baldwin As Limer Passed Island House

An incident in connection with the departure of the Rt. Hon. Stanley Baldwin, Mrs. Baldwin, and the other United Kingdom delegates to the Imperial Conference, on the "Empress of Britain," will remain as an interesting souvenir to Judge Camille Pouliot and the members of his family on the Island of Orleans.

Five years ago when Mr. Baldwin came to Canada as Prime Minister he was presented by Judge Pouliot with an English edition of his book on the Island of Orleans. On his return, Judge Pouliot sent Mr. Baldwin a French edition of his book, as an appreciation of the request of Mrs. Baldwin at the Imperial Conference banquet that "O Canada," be sung, and invited Mr. Baldwin to visit him at the Manor Mauvide-Genest, the Pouliot home on the Island.

"If we cannot have the pleasure of your visit, we shall salute you as the 'Empress of Britain' passes our home on the Island," wrote Judge Pouliot. Accordingly, as the liner was passing the point on the island where lies the Manor Mauvide-Genest at St. Jean, watchers on the bridge and deck of the "Empress" saw the English and French flags, floating at their mastsheads dipped three times. At the request of Mr. Baldwin, the "Empress of Britain" responded with three blasts from her siren.

Tomato Was Originally Ornamental Plant

Not Recognized As Nutritious Fruit Until Nineteenth Century

With the tomato so widely used and enjoying such universal popularity as it does today, it seems hard to realize that for nearly two centuries it was used only as an ornamental garden plant. Like the tobacco plant, the tomato is a native of the Western Hemisphere, its original habitat probably having been Peru. The natives of Mexico called it *tomatillo* and its first appearance in North America records about 1871. It was not until well on in the nineteenth century that the tomato, one of the most nutritious of fruits, came into popular favor on this continent.—Dominion Fruit Branch.

Sweet Clover For Silage

Better To Get Crop In Quickly After Cutting

The most suitable stage at which to cut sweet clover for ensilage is when the majority of plants are in full bloom," writes E. S. Hopkins, Dominion Field Husbandman, in his annual report for 1931. He also observes "It is feasible to haul the crop to the silo immediately after cutting or within two or three hours, while the addition of water to sweet clover silage is not to be recommended. As is the case with oats-penitich ensilage, sweet clover held in storage in the silo for periods varying from three to nine months does not appear to sustain any damage or lose any of its palatability.

Britain Still Farms

It may amuse some people to learn that the value of the output sold off the farms of the United Kingdom exceeds that of agricultural production in either Canada or Australia. For the average predepression year, it is estimated by a writer in the London Times at \$300,000,000, against \$275,000,000 in the dominions mentioned.

Nyasaland now has only five horses, and Kenya Colony only four.

Piano May Come Back

Once Popular Instrument Has Made New Friendships Over Radio

In the piano, the source of so much household enjoyment before the appearance of the phonograph and the radio, in process of staging a comeback? Some observers say that it is and that people who disposed of their pianos for a mere song a few years ago are now returning to purchase of these instruments.

At first when the piano began to go out of the homes and radios to come in instead, the musicians looked exceedingly dubious. Here was further music listening, often simply hearing being substituted for the active joys of music-making with its continual challenge to resourcefulness, its endless discoveries and hardfought triumphs. This passivity was worse than it had been with the gramophones, they argued.

But the musicians, fearful of the radio, were reckoning without the piano. What new friendships it has made over a sadly commercialized radio. Countless listeners, old and young, have been led into regions of undreamed tonal wonders where the piano plays its brilliant part. They have thrilled to its sweep and power under master hands and to its imperious accents and marvelous subtleties of rhythm and color. They soon recognized its capacity for limitless imitation. Now in greater numbers than before, they are wanting for themselves this efficient servant—the most highly organized mechanism ever invented for the making of music by one performer.

Challenge Of Old Habits

Makes-Going Heavy Now That Times Are Hard

It's not keeping up to the Joneses that makes the going heavy and slow for the average man in the country, but keeping up to what it used to be. Ten years ago when the auto demanded an extra two dollars a week from the boss, the boss was on the sea shore smoothing the wrinkles out of his brow, and the man has to do his own sweating, and now the challenge of his old habits makes a heavy demand on him. Indeed it is hard for the man who has fared sumptuously for a long period to return to buckwheat pancakes and fried pork. It's his taste that has changed, but he thinks the pancakes are not as good as they were in the days of his youth.

English Apirists Worried

Nectar Of Lime Tree Has Intoxicating Effects On Bees

Beekeepers are shocked—for their bees insist on getting drunk.

Several have written to a London newspaper about it.

The bees, they say, appear to be in helpless attitudes on the ground, falling off their flowers, refusing to work, and lapsing into drunken stupors.

"Drunk? Oh, yes, the bees really are drunk. Their condition is due to the nectar of the lime tree. It has some strange toxic ingredient which has not been fully investigated.

"Only one or two other plants have the same effect. The bees have to visit a good many time flowers to drink an intoxicating quantity of nectar, but eventually he is overcome and falls to the ground.

"It is exceedingly dangerous for a bee to get drunk. If left alone he will come round in a few hours. But too often, when he is so drunk as to be helpless, a bird just eats him.

"Wasps are even more dangerous when under the influence of an intoxicant. Over-ripe Victoria plums, eaten as they lie on the ground, makes wasps drunk. When moderately drunk they go mad, and get busy with their stings; when thoroughly intoxicated they go to sleep.

"Bees have not enough jaws to bore through the skin of a plum, but they sometimes seize the opportunity of a cracked plum to get drunk."

British Cannery Face Crisis

Fruit Supply Poorest It Has Been In Years

What can a cannery do when there is nothing left to can?

That is the crisis which the British canning industry faces in a year when it hoped to reach its apex.

There is no fruit to can. The shortage is so great that canning factories are running on half time.

The reason is two-fold. The fruit supply has been the poorest in years, and the price is so high that foreign fruits are being kept out, and the demand for English fresh fruit has increased.

Part of the wall of the 200-year-old "cage" at Camberwell, England, believed to have been used by Dick Turpin, has collapsed.

The new Strahov Stadium, being built by the government in Prague, Czechoslovakia, will cost \$210,000.

FANCIFUL FABLES

Daily Service From Churchill Possible

Professor MacIver Predicts Great Development Of Northern Port

Trainloads of Saskatchewan and Alberta grain fed cattle passing through Churchill to the British markets, with daily shipments of Saskatchewan grain to the world's markets during the navigation season was a word picture of possible development of the northern port portrayed by Prof. J. G. W. MacIver, of the animal husbandry department of the University of Saskatchewan, at a service club meeting in Saskatoon.

Professor MacIver is the first Canadian to enter Canada through the port of Churchill, arriving there in the "Bilkworth," the second of the Danish line ships to arrive this season.

He also predicted that within a short time there would be a boat leaving each day instead of the eight or 10 ships laden with grain for the world's markets that now leave Churchill. This is the present limit of the loading capacity, he said.

During the trip he gathered considerable data concerning the Hudson Bay route, and found that the three major objections to the route in Great Britain were the shortages of the shipping season, the prevalence of ice and fog and compass difficulties.

After Forty Years

League For Human Rights Commemorating Release Of Dreyfus

Nearly 40 years after the treason case which brought his name before the whole world, Lieutenant-Colonel Alfred Dreyfus, now living a secluded life of retirement at age of 73, is to be honored. Generally considered the victim of miscarriage of justice when he was found guilty of selling French military secrets to Germany, and sentenced to life imprisonment on Devil's Isle, Dreyfus is pleased to hear the League for Human Rights will place a slab to commemorate the spot at Fort Hallduque where he stepped ashore a free man after serving five years of his sentence. Dreyfus was a young officer when he was accused in 1894. The sentence was followed by a reversal of public opinion and such men as the late Georges Clemenceau and Emile Zola came to his defense.

A year later in 1899 found him guilty, with extenuating sentences, but was pardoned in 1906, and the court of appeals later reversed the original conviction.

The Other Man's Job

Often Involves More Worry Than Appears On Surface

There is one man in the world to day who has our profound sympathy, and that man is President Hoover.

We do not know whether he is a good president or not, whether his acceptance speech was what his friends or what his enemies said it was, but we know that he would not take his job for a thousand dollars a minute, with all the honors and emoluments thrown in. Being a President, like some other jobs, may look easy and attractive at a distance but it is anything but that. When you are asked to carry some other man his position a few enquiries as to what was involved in it, might help to cure you.—The New Outlook, Toronto.

Warning For Foot Tappers

"It is as bad as beat time with your feet as trying to write with your tongue, as well as your fingers." So declared Dr. Adrain Boult, music director of the British Government Broadcasting Service, in an address at Oxford recently. "It is bad psychologically, and you will probably go mad if you go on with it, because it means your limbs are not under control and energy is wasted."

Movies Had No Attraction

After struggling for a year to keep going the only theatre in Churchill has folded up like an accordion. More than 500 men camped there on construction failed to thrill at movie stars. Silent pictures were a flop. Amateur nights didn't draw them, either. Talkies failed miserably.

Might Not Work

"There's only one solution," the Border Cities Star of Windsor has decided: "Railroads will simply have to build zigzag tracks so that locomotive can swerve out of the way of automobiles." But supposing one sign at the moment that the other says.

What is called the world's largest factory for producing plastics has been completed, at Vladimir, Russia.

Italy has banned the release of original French versions of talking pictures.

The Earth's Age Interests Scientists

But Problem Is Still Far From Being Solved

It would be within the scope of scientific statement to say that the mother of all things living is the earth itself. It may seem a little discourteous, therefore, to inquire too closely into the age of the spinning globe which has nourished every generation of life since the beginning, but such calculations and speculations are of perpetual interest to scientists.

A new attack is to be made on the problem by studies in Finland, where the Carnegie Institution of Washington is working with the Geological Commission of Finland to measure the radioactivity of pre-Cambrian rock formations. Of all the rocks in the world, those of Finland are chosen because their geological age can be closely estimated, and the successive rock layers of the earth's crust are there in comparatively undisturbed condition.

The basis of estimate of the earth's age is the relatively simple calculation of the time needed to convert sedimentary sea deposits into stone, together with other scientific guesses at the rate of cooling of the earth's interior. Discovery of the fact that nearly all surface rocks contain minute quantities of radioactive elements has seriously upset the figures based on the measurable cooling of the earth. It is known that some of the loss of heat comes from the radium content of the rocks and not from the hot core of the earth. The earth's age, therefore, is now considered much greater than the estimate of 27,000,000 years which satisfied Lord Kelvin, one of the first scientists to make serious efforts to solve the problem.

Measurement of the loss of heat by radioactivity in Finland's oldest rock formations is intended to correct still further the Kelvin calculations. This may bring them much closer to estimates based on other evidence, so that some day science may be able to establish the birthday of Mother Earth within a few million years or so.—New York Evening Post.

Rare Old Testament Has Been Reproduced

Original Manuscript Was Made In Thirteenth Century

A reproduction of a rare illuminated 13th century manuscript of the New Testament, which survived the fall of Constantinople to the Turks and was discovered 700 years later in a Paris antique shop, was released by University of Chicago on September 1, constituting one of the last contributions of culture by the late Mrs. Edith Rockefeller McCormick.

The original manuscript was purchased in 1927 by Mrs. McCormick after its discovery in the Paris shop by Dr. Edgar J. Goodspeed, professor of New Testament history. Mrs. McCormick retained Max Jaffe of Vienna to reproduce the delicate and intricate miniatures illuminating the ancient manuscript and authorized, at her own expense, its reproduction by the university in a limited edition as a souvenir for scholars under the title "The Edith Rockefeller McCormick New Testament."

Professor Goodspeed said the manuscript was made in the 13th century in the scriptorium of the palace of Michael Pals Logos, one of the last emperors to rule over the glories of Byzantium, and that it is known technically as "Codex 2400."

Trend Now Upward

It seems to be the general consensus of opinion that the proper foundation for business recovery has been reached. That means that from now on the trend is bound to be upward. When it is realized in the mercantile world and with the general public that there is no possibility of lower prices for commodities or necessities of any kind, an incentive to greater buying is inevitable.

The breed of Jersey cattle on the Island of Jersey have kept pure and apart for 500 years.

Many a man who thinks he is a free thinker is only a free talker.

"I never contradict my wife." "Nor I mine. I have only to wait and see contradict herself."—All for Alla, Stockholm.

THE HOUSE OF DREAMS-COME-TRUE

— BY MARGARET FIEDLER
Author of
"The Splendid Folly," "The Herald of Peace,"
Hodder & Stoughton, Ltd., London.

CHAPTER XXXII.—Continued.

"Rest?" she said, "Rest? Do you realize that I have all the remainder of life to rest in? There'll be nothing else to do."

She released herself very gently from Tormarin's arms and, crossing the room to the window, stood looking out.

"How funny!" she said in a rather high-pitched uncertain voice. "It all looks just the same—although everything in the world is changed."

He came and stood by her side. "No," he said quietly. "Nothing is changed, dear. Our love is the same as it was before. Always remember that."

"But we can't ever marry now."

"No. We can't marry—now. You'll never have the Tormarin-temper to bear with, after all!"

She laid her hand swiftly across his lips.

"Oh, it was dreadful!" she said, recalling the terrible scene which she had interrupted. "It—it hardly seemed—"

"For the moment it wasn't. It was the Tormarin devil—the curse of every generation. But I think that Varigny woman could turn a saint into a devil if she tried! She said something about you—and I couldn't stand it."

"Was that it? Then I suppose I shall have to forgive you"—with a pale little attempt at a smile.

But the half-hearted smile faded again instantly.

"Oh, Blaise, what would your temper matter if we could still be together?" she cried passionately. "Nothing in the wide world would matter then!"

Presently she spoke again.

"But it's worse for you than for me. I wish it were more equal."

"How worse for me? I don't understand. Unless—with a brief, and smile—you love me less?"

"Ah, you know I don't mean that! But I've only the separation to face. I'm not tied to anybody I don't love. You've got Nasta to consider."

"Nasta?" He gave a short, grim laugh. "Nasta can go back to where she came from."

There was a long silence. At last Jean broke it.

"Blaise, you can't do that—you can't send her away again," she said in quick, low tones. "She's your wife."

"My wife! She seems to have been oblivious of the fact—and to have wished me to be equally oblivious of it—for the last few years."

"Yes, of course she's been wrong, wickedly wrong. But that doesn't alter the fact that she's your responsibility, Blaise. You must take her back."

"Take her back?"—violently. "I'll be shot if I do. She's chosen to live her life without me for the last few years—she can continue to do so."

Jean laid her hand on his arm. She was smiling wistfully.

"Dear, you'll have to take her back," she persisted gently. "Don't you see—she's not wholly to blame?"

MINEARD'S
"KING OF PAIN"
LINIMENT

W. N. ST. 1081

You've admitted that. You've blamed yourself in a large measure for her running away. It's up to you now to put things straight, to—to give her the chance she didn't have before."

"You're discounting these last few years, in which she has lived a life, allowing me to believe her dead—cheating and deceiving me as no man was ever cheated before. She's cheated me out of my happiness—heavily—"taken you from me!"

"Yes, I know," Jean's voice quivered, but she steeled it again. "But even in that, she was not solely to blame. You've told me how—how weak she is and easily led away. And she's very young. What chance would Nasta have of asserting her will against her sister's, even had she wished to return to you? She ran away from Staple in a fit of temper and because you had frightened her. After that—you can see for yourself—"

—Madame de Varigny is responsible for everything that has happened since."

Tormarin remained silent. The quiet justice of Jean's summing up of the situation struck at him hard.

She waited a moment, then added quietly: "You must take her back, Blaise."

He wheeled round on her violently. "And you?" he exclaimed. "You? Did you ever love me, Jean, that you can talk so coolly about turning me over to another woman?"

She whitened at the bitter accusation in his tones, but she did not flinch.

"It's just because I love you, Blaise, that I want you to do this thing—to do the only thing that is worthy of you. Oh, my dear, my dear"—her hands went out to him in sudden helpless pleading—"do you think it's easy for me to ask it?"

The desperate cry pierced him. He caught her in his arms, kissing her fiercely, ardently.

"Sweetheart! . . . Forgive me! I'm half mad, I think. Beloved, say that you forgive me. There's never been anything against him, glad to feel the straining clasp of his arms about her—to rest once more in her place against his heart."

"Dearest of all," she said tremulously, "there is no question of forgiveness between us now. There never will be. We're just—both of us—struggling in the dark, and there's only duty—brokenly—only duty—to hold to."

They stood together in silence, comforted just slightly by the mere human touch of each other in this communion of sorrow which had so suddenly come upon them, yet knowing in their hearts that this was the very comfort that must for ever be denied them.

At last Jean raised her head from its resting-place and her eyes searched Blaise's face, asking the question she could no longer bring herself to put in words. He met her gaze.

"Jean, is it your wish I do this thing—take Nasta back?"

He felt a shudder run through her frame. Twice she tried ineffectually to answer. At last she forced her dry lips to utter an affirmative.

"So be it," he said. "It's your wish I do this thing—take Nasta back?"

He felt a shudder run through her frame. Twice she tried ineffectually to answer. At last she forced her dry lips to utter an affirmative.

"So be it," he said. "It's your wish I do this thing—take Nasta back?"

He felt a shudder run through her frame. Twice she tried ineffectually to answer. At last she forced her dry lips to utter an affirmative.

soul entailed, had made the two months seem to her more like two years.

She had left Staple for Charnwood on the day following that of Madame de Varigny's visit. It was no longer possible for her to remain under the same roof with Blaise, where the enforced strain of meeting each other daily, and of endeavouring to behave as though nothing more than mere commonplace friendship linked them together, would have been too great for either of them to endure even for the few remaining days which still intervened before the date originally planned for her departure.

Lady Anna, with her usual sympathetic insight, had made no effort to dissuade her, reluctant though she had been to part with her. For herself, the fact that Nasta was alive had come upon her in the light of an almost overwhelming blow. She had never liked the girl, whereas she had grown to look upon Jean as a beloved daughter, and no one had rejoiced more sincerely than his mother when Blaise had confided to her the news of his engagement. At last she would see that grey page in his life turned down for ever and the beginning of a newer, fairer page, illuminated with happiness! And instead, like a tide that had receded far out and then rushes in again with redoubled energy, the whole misery and sorrow of the past had returned upon him, a thousand times accentuated by reason of his love for Jean.

It was with a heavy heart, therefore, that Lady Anna, together with Nick, quitted Staple and established herself for the second time in the Dover House, retiring thither in favour of Nasta who was now installed once more at the Manor. And the thought of how gladly she would have effected these changes had left Jean whom Blaise was bringing home as his bride, added but a keener pang to her sorrow.

She watched with anxious eyes the progress of events at Staple. At the commencement of the new regime Nasta had appeared genuinely repentant and ashamed of her conduct in the past, and there was something disarming in the little, half-apologetic air with which she had at first assumed her position of chaine de Staple, deferring eagerly to Blaise on every point and trying her utmost to please him and conform to his wishes. It held something of the appeal of a forgiven child who tries to atone for former naughtiness by an almost slavish access of virtue.

She accepted with meek docility Blaise's decision regarding the purely formal relations upon which their married life was henceforth to be based, apparently humbly thankful to be reinstated as an wife on any terms whatsoever that he chose to dictate.

"I know I have been bad—bad," she declared, "to run away and leave you like that, I can't—forgiveness—hope for you to love me again—"

And Tormarin had replied with unmistakable decision: "No, you can't hope for that. And I'm glad you understand and recognize the fact. Still, we can try to be good friends, Nasta, at least."

But this tranquil state of things only lasted for a comparatively short time. Very soon, as the novelty and satisfaction of her reinstatement began to wear off, Nasta became more self-assured and, apparently, considerably less frequently visited by Blaise.

His butterfly nature could retain no very deep impression for any length of time, and gradually the characteristics of the old Nasta—the pettish, self-willed, pleasure-loving woman of former times—began to reassert themselves.

Blaise tried hard to exercise forbearance with her and to treat her, at least with justice and with a certain need of kindness. But she did not second his efforts. Instead, she became more exigent and difficult as time passed on.

She was no longer satisfied by the fact that she was once more installed as the mistress of Staple. She demanded a husband who would surround her with all the little attentions that only love itself can dictate, whom she could alternately scold and cajole as the fancy took her, but who would always come back to her, after a tiff, ready anew to play the adoring lover.

(To Be Continued.)

Growing Coffee Beans
Two Russian families are raising coffee on farms near New Bern, North Carolina. The coffee beans are fully developed, and the Russians are well pleased so far with the success of their crop. They raised coffee in their native country.

The teacher of a gliding school in Germany has trained falcons to fly within a limited area so that he can study their soaring flights with the aid of a motion picture camera.

Flush away those ugly

Yellow Stains...

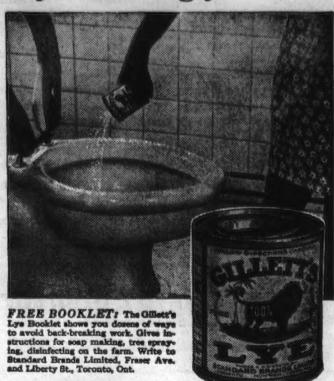

Gillet's Lye cleans closet
bowls without scrubbing.
Banishes odors, kills germs,
frees drains...

WHAT woman doesn't want to get rid of it! The most unpleasant part of house-cleaning. Scrubbing toilet bowls. Thanks to Gillett's Pure Flake Lye... This annoying job has been made easy.

Just sprinkle Gillett's Lye—full strength—into the water. Off come all stains...without scrubbing. Germs are killed...odors banished.

And more important, Gillett's Pure Flake Lye will not eat away enamel, or destroy the finish of sinks and bathtubs.

REMEMBER—this powerful cleanser and disinfectant makes all your household cleaning easier. Ask for Gillett's Pure Flake Lye.

FREE BOOKLET: The Gillett's Lye Booklet shows you dozens of ways to avoid back-breaking work. Gives instructions for soap making, true dyeing, disinfecting on the farm. Write to Standard Brands Limited, Fraser Ave. and Liberty St., Toronto, Ont.

New dissolve lye in hot water. The action of the lye itself heats the water.

GILLETT'S LYE
BATS DIRT

THE RHYMING OPTIMIST

By Aline Michale

LOVE'S WORDS

Love has few words. Each threadbare phrase
Has rung through countless lovers' throats.

Since Caesar sought Egyptian ways
And Jacob served in Rachel's house.
So poor are they, so old, so weak,
Such foolish and such futile things,
In vain does every lover seek
New speech to lend his longing wings.

So poor! But, ah, how sweet, how dear
They fall upon the eager ear;
The words of love that catch each fear
And bring the sense of heaven near!

So it must be old loves bestow
Their worth, till treasure waxes vast,
And love's few words the richer grow
From all the passion of the past.

Captures Honors Again
Mlle. Odette Piaus, the world's speed-typing champion, has again won the championship of the French Typing Academy at Rozen, France, by making the seventh successful time for her to capture the honors. She averaged a speed of 90 words a minute copying unknown text and 120 words a minute for sentence repeated over and over. She was the regular champion, Mlle. Piaus became the world word champion last October in Paris.

In Spain the traffic code forbids motorists to alight from the off side in traffic.

PAIN
relieved
instantly

Aspirin will dispel any pain. No doubt about that. One tablet will do it. Swallow it. The pain is gone. Relief is as simple as that.

No harmful after-effects from Aspirin. It never depresses the heart, and you need never hesitate to make use of these tablets.

So it is needless to suffer from headache, toothache or neuralgia. The pains of sciatica, lumbago, rheumatism or neuritis can be banished completely in a few moments. Periodical suffering of women can be soothed away; the discomfort of colds can be avoided.

Aspirin tablets have other important uses—all described by the proven directions in each box. Look for that name Aspirin on the box—every time you buy these tablets—and be safe. Don't accept substitutes. "Aspirin" is a trade-mark registered in Canada.

Rules For a Short Life
If Followed Chances Are Very Good For Success

To create the impression that you are a very busy man always speed up when approaching intersections.

When passing other cars pick out a suitable spot on a hill or curve. There's no fun in passing on the straightaway.

Use only half the road, but be sure it's the middle half. Then you won't run over the edge.

Considerable time may be saved in driving out of alleys by stepping on the gas just before reaching the sidewalk.

Pay no attention to grade crossings. Let the engineer do the worrying. He gets paid for watching the right-of-way.

Don't wait for the green light. It will be along in a minute, and anyhow, a red one will do in a pinch.

Before they were married she couldn't bear to let him out of her sight, she loved him so well. After they were married she couldn't bear to let him out of her sight. She knew him so well.

Magistrate: "You are charged with breaking a chair over this man's head."

Prisoner: "I didn't mean to break the chair, your worship."

The Real Edison

Was Very Human and Had An Engaging Personality

In a recent issue of Harper's, there appears an intimate study of Thomas Edison by one of his laboratory associates that will probably be an eye-opener to the public which knows the great inventor only by reputation. Interviews, especially in late years, had pictured him as a somewhat mild-mannered, gentle old man, a patriarchal figure commanding respect and admiration; the magazine writers of gentlemen of the press laid it on rather thick and gave us the general impression that Edison was an immortal first and a human being afterwards.

His intimates, of course, knew him for what he was and it is good that the rest of us should likewise be in on the truth. For Edison was a rare spirit, full of an Elizabethan gusto. How many of us had regarded him as being more or less saintly—photographs of him somehow suggested that—and how pleasant it is to discover that he was full of the most engaging humors and traits imaginable. There was a vigor and virility about him that would have distinguished him from the general hum of mankind had he never become a famous inventor. He seems to have had his own ideas about every subject on earth and to have set them forth with a raciness of expression that did the listener's heart good.

There is a tendency to give the immortals their due more on the side of achievement than on character and personality; certainly that is true in Edison's case. To read Mr. Rosanoff's study of him is to appreciate Edison in the role of a man in which he was quite as successful as in the field of invention.—Detroit Saturday Night.

Great Contribution To Progress Of World
Art of Printing From Movable Type

Man's Greatest Invention
In the midst of all the discoveries and inventions, it may not be generally known that the art of printing from movable type is perhaps the greatest invention ever devised by the mind of man. It provided the facilities for the giving of knowledge to the masses. Through the medium of books, pamphlets, newspapers and other forms of literature, knowledge previously in the hands of monks spread throughout the world.

To the mind of man gave light where formerly darkness prevailed. It is almost impossible to estimate the progress that has been made in the world through this great invention.

The Poor Man's Friend.—Put up in small bottles that are easily portable and sold for a very small sum. Dr. Thomas' Electric Oil possesses power in concentrated form. Its cheapness and the varied uses to which it can be put make it the poor man's friend. No dealer's stock is complete without it.

No Gypsy Royalty
Irving Brown, Columbia University professor, New York, has punctured the belief that gypsies have kings and queens who arrange royal marriages and such like. The professor, who spends his vacations among the Romany rovers, said that the talk about gypsy royalty is "an American notion." It is against the spirit of gypsies to have rulers, he said.

Portugal's agricultural prospects are the best in many years.

Easy Teething
"Baby cut all his teeth with no trouble, thanks to BABY'S OWN TABLETS," writes Mrs. W. H. Hamilton, Ontario. Scores of other Mothers have written in similar vein.

Give YOUR child BABY'S OWN TABLETS for teething troubles, upset stomach, simple fevers, colic, colds, constipation, sleepless nights, or whenever he is cross, restless and fretful. Easy to take as candy, and absolutely SAFE—see it in each 12-cash package. Over 1,250,000 packages sold in 1931.

Dr. Williams' BABY'S OWN TABLETS

LOCAL NEWS

Mrs. J. P. Winning entertained at the tea hour on Wednesday.

Mr. and Mrs. Everett Bills were visitors in the city on Tuesday.

Mrs. T. Goldie and Mrs. J. R. Gilchrist were visitors at the home of Mrs. C. Wight, Carstairs, on Monday.

Mr. and Mrs. D. Patterson and Mr. and Mrs. R. E. Edwards of Calgary, are visiting at the home of Mr. and Mrs. R. M. McCool.

F. Amery and J. Gray of Walla Walla, Wash. are the guests of Mr. and Mrs. R. T. Amery.

BORN—To Mr. and Mrs. J. J. McCordell on September 14, a daughter, Mary Frances.

In reporting the above incident last week, our information was that a son had arrived at the McCordell home. This was a very bad error indeed, and we humbly apologize to Mr. and Mrs. McCordell for the mistake.

We have been told confidentially that the Doctor also made a mistake, as Jack had wanted a boy very badly, but the Doctor had arrived with the wrong package.

C. G. I. T. NOTES

The C. G. I. T. held their opening meeting at the home of their leader Mrs. R. M. McCool on Thursday evening.

The Golden Key group is to join with the C. G. I. T.

The following officers were elected: President, Jessie Young; Vice President, Alma Gordon; Secretary, Gladys Willis; Treasurer, Verna Pogue; News Reporter and Song Leader, Florence Cruickshank.

The next meeting is to be held on Thursday night at the home of Mrs. R. M. McCool.

I Saw

Bill Pogue washing his windows. Happy and Heavy going to work at 7 a. m. on Monday morning and making more noise than two drunken sailors.

Fred Stevens selling tickets for the Armistice Dances.

Jake Ott brushing the tickler he is growing on his upper lip.

Joe Milner looking for a cow that will give milk.

Duff ordering his tickets for the Toronto-Montreal baseball game to be played in Calgary on Saturday.

Joe Reeves putting up a bet that Chicago would win the first game of the world's series.

Happy McMillan looking at his bank roll and putting it back in his pocket without making a bet on the world's series.

Bill Wood trying to figure out a scheme whereby he could stop truck drivers from stealing gasoline at the Highway Garage.

LOCAL NEWS

There are a few cases of whooping cough in town.

The Crossfield Legion is holding a smoker in the U. F. A. Hall on Wednesday, Oct. 12.

E. C. Collier spent the week-end in town renewing acquaintance.

Mrs. G. A. Bishop of Calgary was a visitor in town on Monday.

A. J. Hunter of Chinook spent the week-end at the home of Mr. and Mrs. D. H. McFadyen.

Mr. and Mrs. D. Ontkes of Drunheller were visitors in town on Saturday.

Mr. and Mrs. A. Stevens and Donnie McFadyen were visitors in Red Deer on Wednesday.

Mrs. Ward of Calgary is the guest of Mrs. Fox.

Mr. and Mrs. R. M. McCool spent the week-end visiting friends in Calgary.

Gordon Schofield of Princeton, B. C. spent the week-end the guest of Mr. and Mrs. H. J. Schofield.

Remember the Village is offering a 10 per cent discount on all taxes paid before December 1st.

Adam Cruickshank and Frank Brown were out shooting on Saturday and brought in 30 ducks.

McCaskill Bros. loaded a car of Garnet wheat over the platform on Monday.

Capt. Wigle is getting along nicely following his recent serious illness and was able to be in town last week for the first time in weeks.

Miss Grace Williams who is teaching at Summit Hill school, spent the week-end at her home here.

A large number from the town and district are planning to attend the Montreal-Toronto baseball games in Calgary on Saturday, October 1st.

The lock on the gasoline pump at the Highway Garage was broken off on Friday night and about 40 gallons of gasoline stolen. This is the fifth time this summer that Bill Wood has been the victim of gasoline thieves.

Geo. Clement of Vancouver, B. C. is relieving Clarence Casey at the Crossfield Garage during the month of October. Mr. Casey has taken over the more arduous job of running a threshing machine.

Evidently Dean Tweedell objected to having a family thrust upon him on so short a notice, at any rate he refused to take a beautiful blue eyed doll when his number was drawn at the J. W. A. tea and sale of cards on Saturday.

Miss Margaret Fitzpatrick was the holder of the lucky ticket on the second draw and willingly adopted the beautiful baby.
